Description

Axim Concealed Transom Door Closer Mechanism

9900 Series

The Axim 9900 series door closer has been developed to provide the market with a truly universal door closer. This closer will offer the answer for new installations and for door maintenance where other leading transom closers have failed and a replacement closer is necessary.

The 9900 series can be used to replace Axim 8800 series, Dorma, Peters Jackson, Newman Tonks, Ryobi and other leading transom closers without costly modifications to door or frame. A truly cost effective high quality concealed transom door closer that allows for minimal stocking levels.

Provides controlled closing of single or double action aluminium doors. Features include dual closing speeds to allow complete flexibility in closing action, both of which are fully adjustable on site.

Mechanical backcheck protects doors and closer when opening past 105 degrees.

A high quality cost effective concealed transom door closer with fixing brackets, fixings, and fitting instructions.
