Important Information: Fitting the DFS Bogie Wheel Hinge Assembly

Skinned fixing positions

Firstly fit these two screws centrally in the slots (use a suitable size: 4.5 – 5mm), which will allow for initial set-up and adjustment of the door

Skinned fixing positions

Skinned Fixing Positions

Once the door is adjusted correctly you must install final fixing screws through two of the skinned fixing holes (the green pair or the purple pair), this will stabilise the hinge and prevent twisting which can result in hinge part component fracture and failure. Do not fit all four screws as this will prevent any future adjustments you may need or wish to make.
