**Important information: Fitting the DFS Basic Wheel Hinge Assembly**

**Wheel fitting positions**

Ensure fit these two screws centrally in the slots just a suitable size: 4.5 - 5mm, which will allow for initial set-up and adjustment of the door.

**Wheel fitting positions**

**Wheel fitting positions**

Once the door is adjusted correctly you must install final fixing screws through face of the wheel fitting hole (the green part on the purple part), this will stabilize the hinge and prevent rattling which can result in large part component fracture and failure. Do not fit all four screws as this will prevent any future adjustments you may need to wish to make.
