Description

Maco MK 2 Shootbolt Gearbox & Face Plate - 20 or 22mm Backset

The MK II Shootbolt Locking System incorporates a reverse locking feature for improved security. The reverse action gearbox allows the locking mushroom cams to locate from both directions into the striker to give high security locking.

Tested to the enhanced security requirements of BS7950 on major profiles. Centre mushroom cams tested to 8.7 kilo newtons, more than double the current requirements of BS7950 of 3 kilo newtons.

- Backset: 20 or 22 mm
- Cam height: 7.7 or 9.0 mm
- Cam adjustment: +/- 1.0 mm
- Faceplate width: 16 mm
- Eurogroove depth: 12 mm & shallower Eurogrooves
- Salt spray tested to 480 hours
